

HURRICANE

PolarPad™

HURRICANE HVAC PAD

Start Strong with PolarPad... Hurricane HVAC Pads!

Patent Pending

The new Hurricane HVAC Pad from PolarPad transforms a market long dominated by bulky, damage-prone concrete pads. Engineered with **patent-pending technology** and crafted from **high-strength HDPE**, this next-generation base delivers **exceptional durability, a level surface, and unmatched ease of handling**. Designed for versatility, the Hurricane HVAC Pad **accommodates a wide range of condenser sizes**, while its **lightweight construction** enables a **true single-person install**—cutting labor time and costs. By combining **structural strength, weather resistance, and modern design**, DuraPlas brings forward a smart, clean and efficient foundation for HVAC equipment.

Features & Benefits

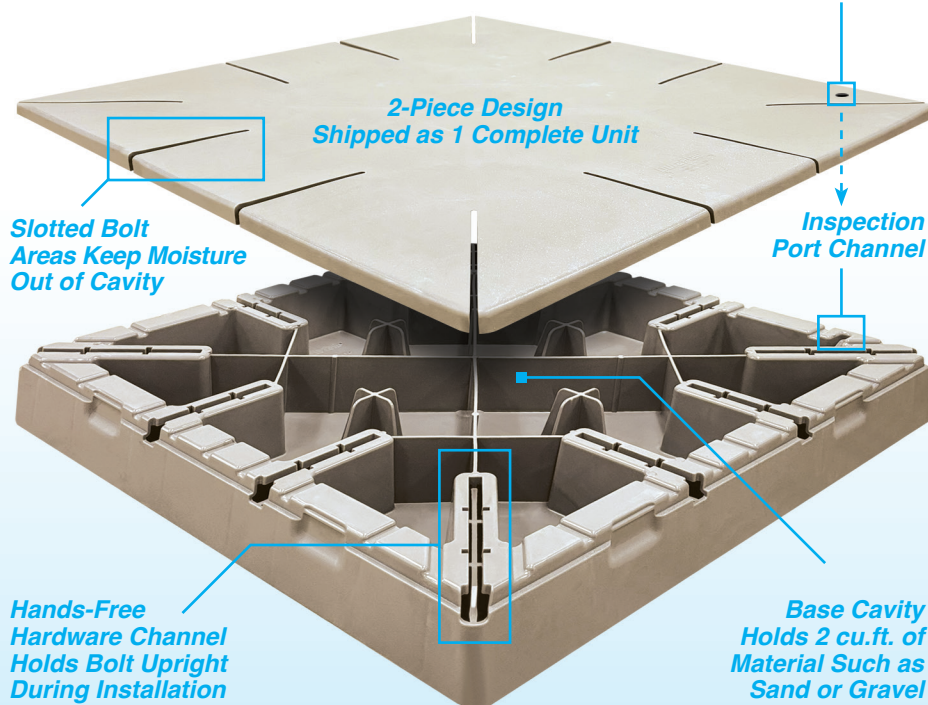

- Engineered for ALL Hurricane Areas Including Florida HVHZ zones
- Works for Condensers as Narrow as 25" and up to 36" in Width
- Strong & Durable - Just Like the Original PolarPad & PolarPan
- Easy / Single-Person Install
- No Drilling
- No Cracking
- No Busted Backs / Fingers
- Added UV Inhibitors for Long Life

Specifications

- **Size:** 40"x40"x5" (More sizes to follow)
- **Weight:** 42 lbs (Base: 29 lbs, Lid: 13 lbs)
- **Included with PolarPad:**
 - 12 Attachment Bolts, 12 Nuts, 12 Lock Washers
 - Bag with QR code linking directly to installation instructions
